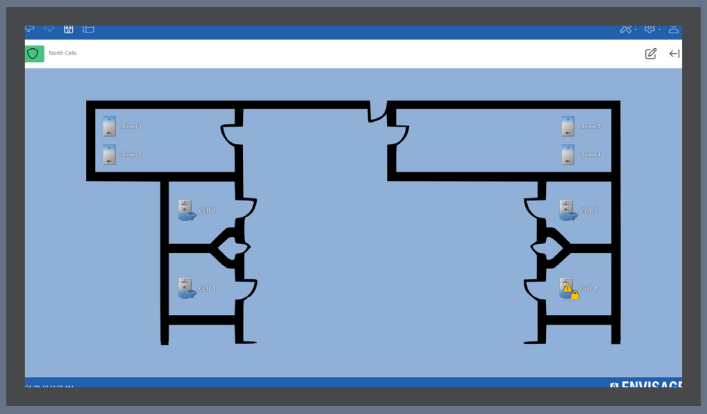
I-CON®
A WATTS Brand

ENVISAGE® Pro

The Ultimate Companion to the NEXUS® Pro

Facility Specific Mapping



- User accounts can be created based on role or location
- Login via any computer connected to the LAN
- Analytics intelligence to track and monitor water usage and fixture abuse
- Multiuser login capability
- Controller configuration and port linking
- View all devices on map for easy maintenance
- Actionable insights to improve water efficiency

Control with a wired or wireless network

Start lockouts; prevent cell flooding

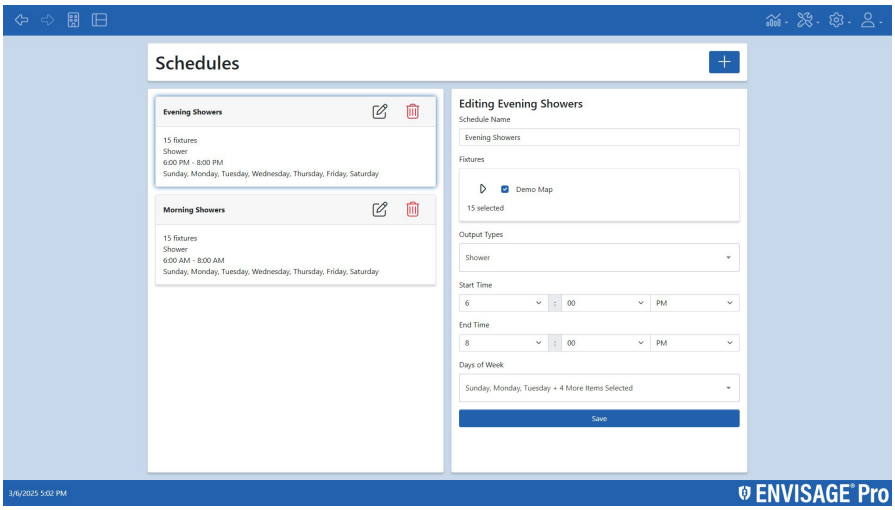
Schedule to prevent unwanted activation

Operate fixtures remotely

ENVISAGE® Pro

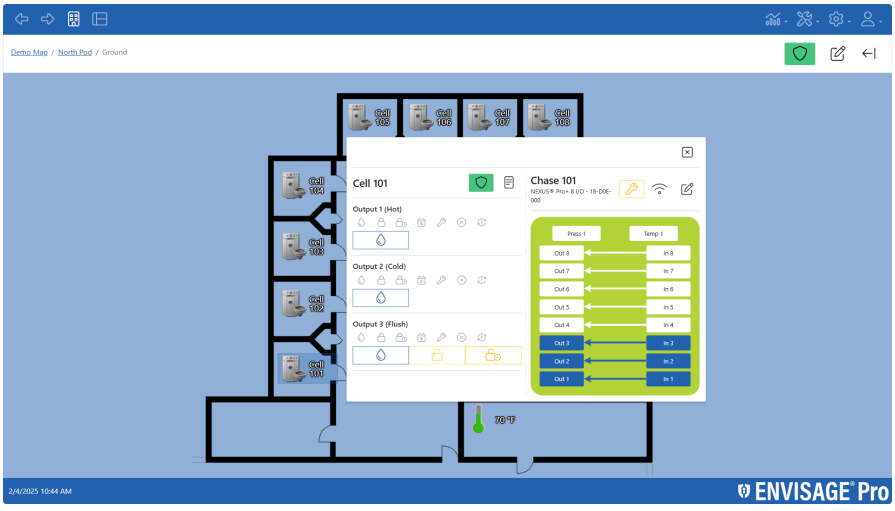
The Ultimate Companion to the NEXUS® Pro

Scheduling



Up to 16 Usability Schedules can be added to each controller. Schedules can be set per location, per device or per output type. Even offline the controller will follow the schedules to only permit usage while in the allotted time windows.

Map Device Modal



From this view, you can activate the fixture, remove a lockout, Lockdown the cell, get fixture and device information, and a lot more.
