

Front Access 84" Trough Washdown Urinal

Specification Guide

- 14-gauge type 304 stainless steel
- Seamlessly welded
- Satin finished surfaces
- Washdown flushing action with self-draining, flushing rim
- Flush connection is 1-1/2" NPT male
- Removable, high volume, stainless steel, beehive strainer
- 1-1/2" NPT male fitting for removable waste
- Vandal-resistant, P-trap enclosure
- Anchoring locations vary based on length of urinal (minimum 4)

Part No. 101316 : AF

Fixture may be featured with available options.

► Description

I-CON urinals are seamlessly welded, 14-gauge type 304 stainless steel. Exposed surfaces have satin finishes. The fixture does not require a wall opening and chase area for installation and maintenance. The urinal features a washdown flushing action with a self-draining flush rim. A removable high volume, stainless steel, beehive strainer is included. The fixture has a vandal-resistant, P-trap enclosure. Exposed fasteners are tamper-resistant stainless steel.

► Recommended I-CON Intelligent Control System

The system includes low voltage, water-resistant controllers; waterproof, stainless steel actuators; and direct-acting solenoid valves with no diaphragms. The ASSE-certified flush valves are proven to be more reliable and less expensive to maintain than traditional valves. The I-CON System can be configured as a standalone or communicating system, linked to our touchscreen PC technology. Both configurations offer the capability to stop flooding and abuse while managing toilet flushes per hour/per fixture, which reduces water usage and sewer costs.

► Accessories & Options

See accessories and available options on page 2.
