### ► Description

I-CON lavatories are seamlessly welded, 14-gauge type 304 stainless steel. Exposed surfaces have satin finishes. The fixture requires a wall opening and chase are for installation and maintenance. The lavatory is furnished with an oval basin, integral strainer, 4" high backsplash, and an air-circulating, self-draining soap dish. Exposed fasteners are tamper-resistant stainless steel.

### ► Recommended I-CON Intelligent Control System

The system includes low voltage, water-resistant controllers; water-proof, stainless steel actuators; and direct-acting solenoid valves with no diaphragms. The I-CON manifold lavatory valve allows for one (1) hot and cold water supply for up to four (4) lavatories. Its advanced design allows for 0.5 GPM without a rubber flow restrictor. The I-CON System can be configured as a standalone or communicating unit linked to our touchscreen PC technology, which has the capability to stop flooding and abuse.
