

Buck & Boost Transformer (28VAC)

Part No. 101808

► **Description**

The 28VAC Buck & Boost transformers are designed to provide power to multiple I-CON controllers. These transformers are available in a variety of primary voltages and can power up to 30* I-CON NEXUS® controllers.

► **Features**

- Insulating/isolating transformers
- Fuse and switch for primary power
- LED indication for secondary power

► **Options**

Primary Voltage

- 120VAC
- 208VAC
- 240VAC
- 277VAC

► **Accessories**

See Accessories Section of the I-CON catalog or contact our Customer Service Team for details.

Recommended Specification

The Buck & Boost Transformer 101808 is a single phase, dry type distribution, isolating transformer. Transformers include a fuse and power switch on the primary voltage side, and LED indication for secondary power. These transformers are designed to provide power for up to thirty I-CON NEXUS® controllers.

**The number of controllers is based on the wire gauge and the length of runs on the secondary side. The secondary current and wire gauge required is based on type of controllers, fixture types, length of secondary runs, and other variables. Consult I-CON Customer Service team for assistance.*
