► **Accessories**

For additional accessories, see the Accessories Section of the I-CON catalog or contact our Customer Service Team for details.

Recommended Specification

The I-CON ENVISAGE® Network Management Console comes pre-configured from the factory with simplicity and security in mind. It is plug-and-play with I-CON communicating series controllers. ENVISAGE® NMC is a Windows-based computer that comes pre-configured to run ENVISAGE® and only ENVISAGE® securely. The computer will automatically launch into the ENVISAGE® software. Attempts to leave ENVISAGE® to access Windows or other programs will require administrative passwords.

*To facilitate remote access to an ENVISAGE® powered computer, Microsoft® Windows® Remote Desktop functionality can be enabled and pre-configured prior to shipment. I-CON uses static IP addresses to allow remote access. A desired IP address can be provided, or I-CON will select one. Configuration of the required network infrastructure, as well as ongoing support and maintenance of the Remote Desktop functionality is the customer's responsibility and is not supported by I-CON.
