featuring **TruFLUSH®**

Intelligent Water Conservation™

The COBALT Pro® Exposed Sensor Flush Valve is designed for maximum performance and greater reliability than a diaphragm or piston valve.

101819 Series

SIMPLE • POWERFUL • ACCURATE

Water Closets

101819 : 3010

Exposed Sensor Flush Valve
for Water Closets; Top Spud;
11.5" Rough In

101819 : 3015

Exposed Sensor Flush Valve
for Water Closets; Top Spud;
16" Rough In

101819 : 3020

Exposed Sensor Flush Valve
for Water Closets; Top Spud;
24" Rough In

101819 : 3025

Exposed Sensor Flush Valve
for Water Closets; Top Spud;
27" Rough In

101819 : 3030

Exposed Sensor Flush Valve
for Water Closets; Rear Spud;
11.5" Rough In

101819 : 3035

Exposed Sensor Flush Valve
for Water Closets; Rear Spud;
16" Rough In

101819 : 3040

Exposed Sensor Flush Valve
for Water Closets; Rear Spud;
24" Rough In

101819 : 3045

Exposed Sensor Flush Valve
for Water Closets; Rear Spud;
27" Rough In

Water Closets & Urinals

101819 : 3000

Exposed Sensor Flush Valve for
Urinals & Water Closets; Less Vacuum
Breaker Assembly; Less Angle Stop

101819 : 3005

Exposed Sensor Flush Valve
for Urinals & Water Closets; Less
Vacuum Breaker Assembly

101819 : 3050

Exposed Sensor Flush Valve
for Urinals; 3/4" Top Spud;
11.5" Rough In

101819 : 3055

Exposed Sensor Flush Valve
for Urinals; 1-1/4" Top Spud;
11.5" Rough In

ProLAST®

	Flush Volume				
Water Closets	1.1gpf	1.28gpf	1.6gpf	2.4gpf	3.5gpf
Urinals	0.125gpf	0.25gpf	0.5gpf	1.0gpf	—

ProLAST® T-Seal Technology: Single piece unit, industry's largest bypass, seals at low PSI, tamper proof GPF, no natural rubber components, lasts up to 5x longer than industry standard.

featuring **TruFLUSH®**

Featuring TruFLUSH®: I-CON's built-in pressure transducer provides additional flushing accuracy by detecting variations in water pressure and making electronic adjustments as needed to flush at designated flush volume.
