

# Flow Restrictor Installation Guide

ELEMENT® Hot and Cold Electronic Manifold Lavatory Valve

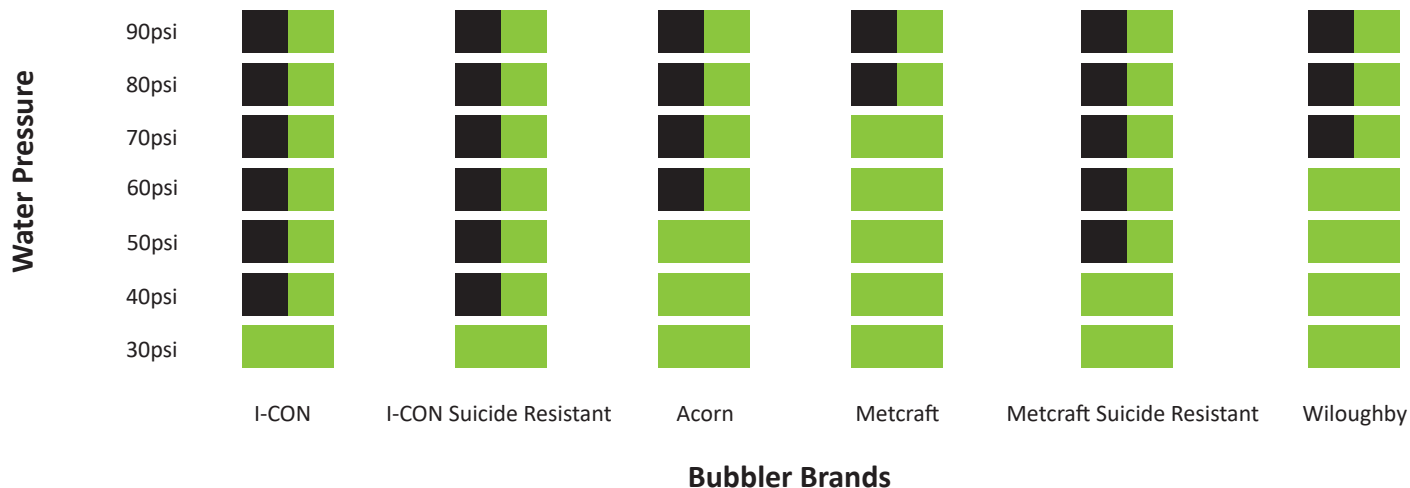

**Legend**

	needs black flow restrictor & green flow regulator		needs green flow regulator
---	--	--	----------------------------

## 5' Guidelines

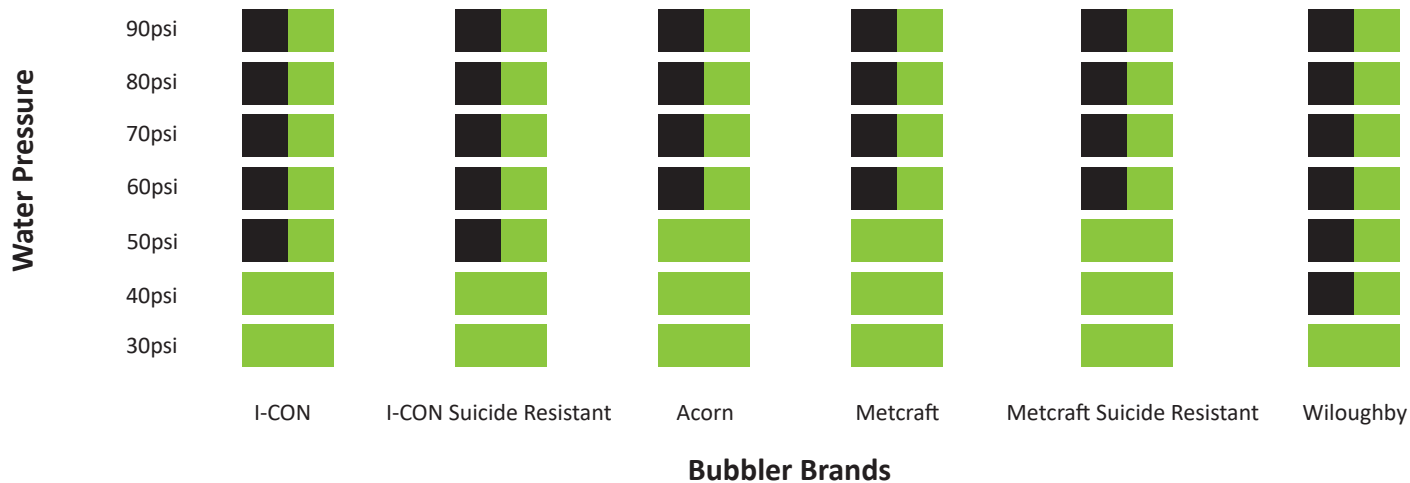

Use the chart below to see when the black flow restrictor needs to be added to your valve.

All bubblers should have a minimum of 5' of tubing, even if this means having to roll up some slack.

## 15' Guidelines

Use the chart below to see when the black flow restrictor needs to be added to your valve.

All bubblers should not have more than 15' of tubing running to them.

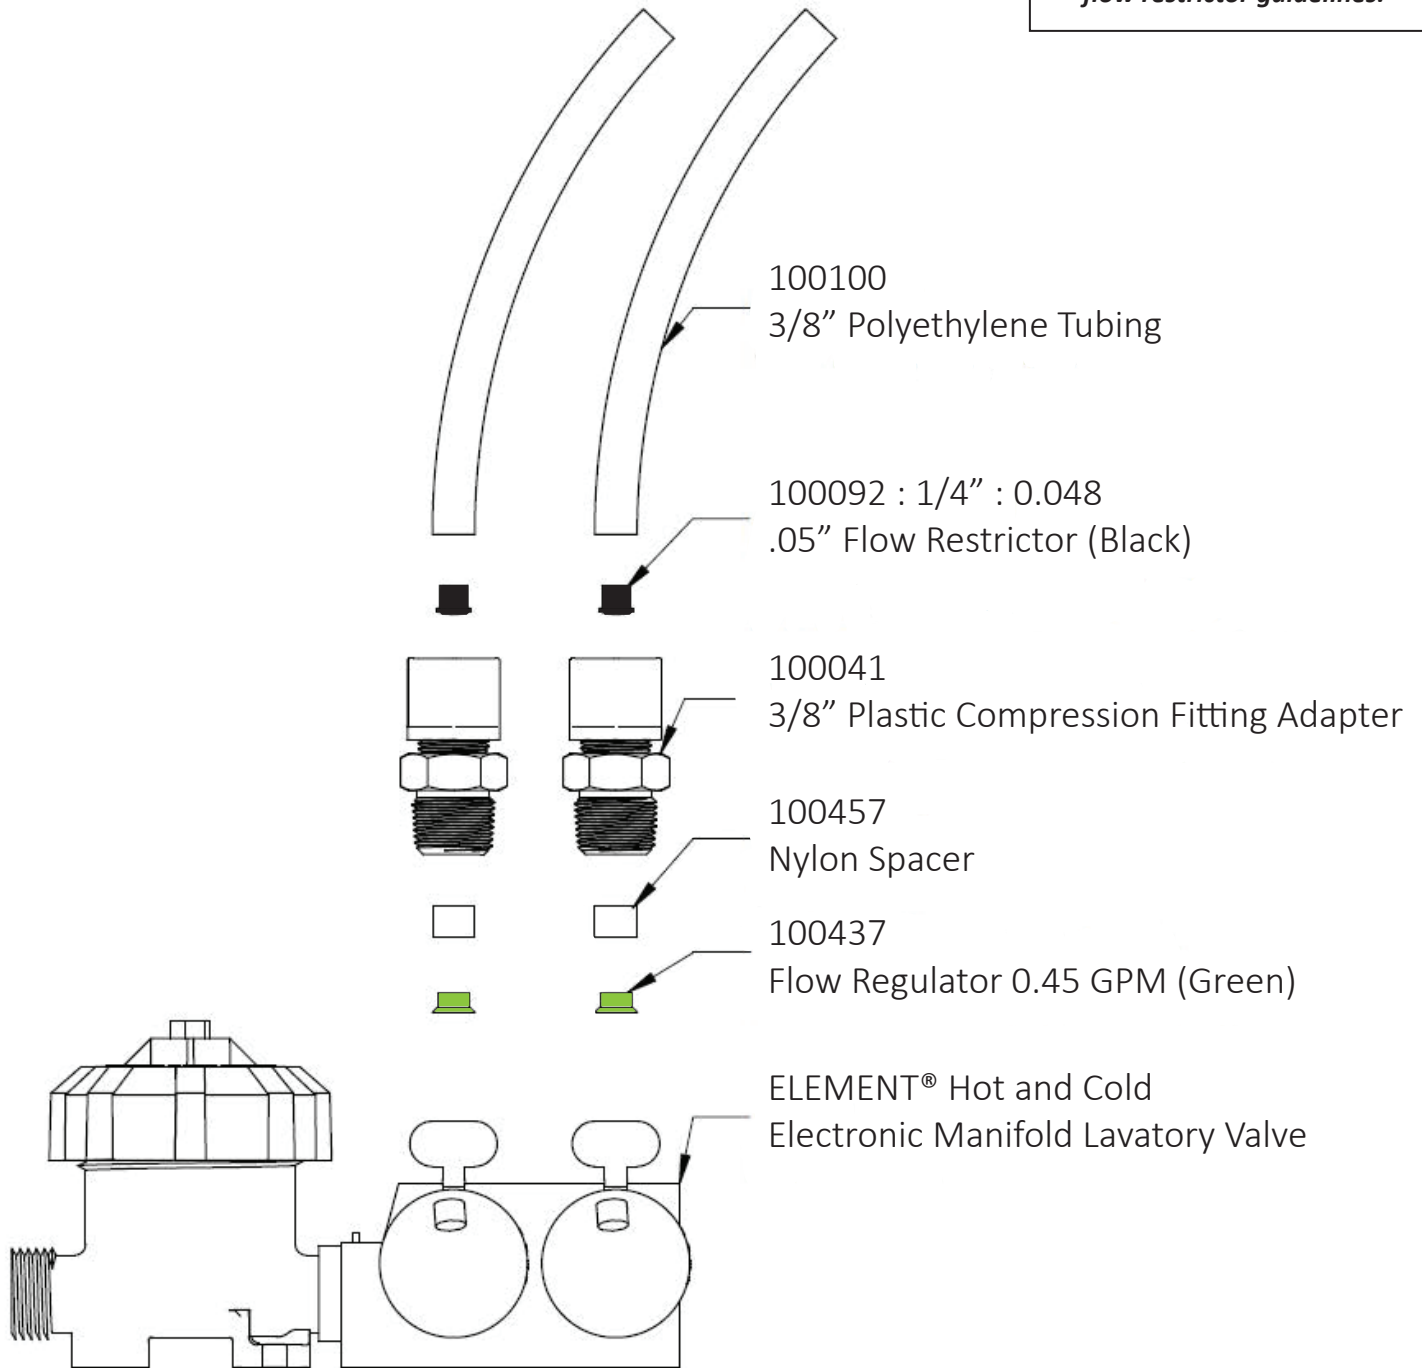

Additional product support can be found at [i-con.com/support](http://i-con.com/support)

# Flow Restrictor Installation Guide

ELEMENT® Hot and Cold Electronic Manifold Lavatory Valve

See chart on second page for flow restrictor guidelines.

Be sure that the end of the 100100 Tubing is cut straight and clean.  
This ensures that it will function properly with the 100092 Flow Restrictor.
